The **Accu-Feed GWF 410** Guidewire Feed System provides automatic handling of wires for taper or barrel grinding into centerless grinder at rates up to 2.25 seconds exchange time. This system provides rapid payback and improved grind capability compared to manual feeding.

Features:

- Works with all brands of centerless grinders
- Fully automatic – feeds and retrieves hundreds of wires without operator assistance
- Improves grind repeatability by 10X compared to manual feeding
- Quick change over for part length, diameter, and grind length
- Self contained – does not require interface to grinder
- Touchscreen operator display with parts counter
- SPC functions
- Low initial cost and easy to maintain – quick payback
