

MEDICAL SYSTEMS

The **Accu-Trim 20M** precision workstation trims your rough-cut assemblies to precise lengths with a square, burr free cut. The Accu-Trim was designed to bring safe, ergonomic and precise tube cutting to lower volume production areas that are not ready for high speed automated equipment.

FEATURES:

- Square, burr free cuts, based on Accu-Cut 202 technology
- Can be quickly customized for your assembly
- Uses standard razor blades
- Quick adjustable length

SPECIFICATIONS:

- Catheter cut length— up to 36 inches
- Diameter — .008 to .200

TWO VERSIONS available to suit your production needs:

- The **manually powered** Accu-Trim features a handle on the blade arm, giving the operator control over the cuts.
- The **air-powered** Accu-Trim actuates precision cutting with a foot switch. This version is recommended for heavier tubing.
