

## MEDICAL SYSTEMS

The **Automated Coil Assembler ACA** is a natural evolution of our Advanced Guidewire Feeder that combines our feeding, cutting, assembly, bonding, and trimming technologies into one operation. By employing our top shelf / bottom shelf design, we are able to automate and integrate these processes for multiple long wires, safety ribbon, etc., into one efficient, safe, and reliable assembly that requires little set-up and less supervision. Please call or e-mail us right away to discover what we can automate for you – your employees, shareholders, and customers will all be glad you did!

### Features:

- Top Shelf / Bottom Shelf design has a smaller floor “footprint” and puts everything within easy reach
- Materials are placed in bin, start button pressed, and then completed product is removed from bin
- Accurate and precise assemblies
- No waste, little W.I.P, and no rework
- Easily customized to your specific automation application
- ASG in-house technology and experience results in a high-quality, durable, safe, and adaptable machine
