

## MEDICAL SYSTEMS

The **Accu-Cut Micro** precision tubing cutter provides high quality cutting at a lower cost and smaller footprint than the industry standard Accu-Cut 202L. The Accu-Cut MICRO was designed to bring safe, ergonomic, and precise tube cutting to on-line applications where point of use cutting is desirable. It is also perfect for lower volume production areas that are not ready for high speed.

### FEATURES:

- Automatic feed and cut
- Highly accurate closed loop length control
- Quality square, burr-free cuts, based on Accu-Cut 202 technology
- Low acquisition cost (less than half the price of the Accu-Cut 202L)
- Low cost of use (standard off-the-shelf razor blades)
- Versatile all-electric operation, no air connection required

### SPECIFICATIONS:

- Diameter—up to 5mm (.20 inches)
  - Rate—Up to 1 piece per second
  - Length repeatability—typical +/- 0.5% of length
  - Cut length—programmable up to .81 m (32 inches)
- Dimensions—20cm wide x 18cm deep x 30cm high (8" x 7" x 12")
